***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I: Claims 1-29 and 37-40, drawn to a combination of a storage container comprising a base panel, a plurality of side panels, a roof panel and connector means, classified in Class 206, subclass 600 and others.

Group II: Claims 30-36, drawn to a subcombination of a base without any details of a storage container, classified in Class 108, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed does not require the particulars of the skeletal frame including pairs of interconnected parallel hollow channel members having closed upper surfaces, outer peripheral edges and a pair of spaced apart tubular fork. The subcombination has separate utility such as being used by itself as a bridge or a cover.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because by their different classification and because they are capable of separate manufacture, use and sale, restriction for examination purposes as indicated is proper.

Art Unit: 3728
